

Sekisui Chemical Group "Environmental Management Policy"

Mission

We, the Sekisui Chemical Group, aim to be a Global Environmental Top Runner that contributes to the realization of a sustainable society by enabling the continuous growth and co-existence of ecology and the economy.

Basic policy

Each company in the Sekisui Chemical Group advances approaches that contribute to the prevention of global warming, the preservation of biological diversity and structuring of a recycling-based society in all countries and regions where they have operations, in order to leave this beautiful earth for our children in the future.

- 1) We contribute to the environment through our products and services, with consideration given to the environment in all stages of the product life cycle from research to procurement, production, sales, use, and disposal as waste.
- 2) We carry out environmentally conscious business activities in all our workplaces and offices, and promote our approach to the environment through cooperation with our customers and business partners.
- 3) We make efforts to reduce the environmental impact of greenhouse gas emissions and hazardous chemicals, etc., and to prevent pollution by promoting the effective use of limited resources and energy.
- 4) We observe related laws, regulations, international rules, etc.
- 5) We make efforts to improve environmental awareness through education, and advance continual improvements by setting our own objectives and targets.
- 6) We enhance confidence through close communications with society.
- 7) We aggressively work on social contribution activities such as nature conservation activities in each region

(Revised March 2017)

Definition of Zero Emission;

The company defines zero emissions as total recycling of all the waste generated in its workplaces. It targets not only industrial waste generated in production processes, but also all waste generated in offices, and welfare facilities, etc. It also means zero incineration without thermal recycling, and no landfill inside or outside of its premises. Contactors for recycling must be specified and recycling methods made precise.

3 R Policy:

Reduction

Reuse

Recycle

Policy on the environment Sekisui S-lec B.V.

As the consequence of Sekisui S-Lec's mission to produce in the most environmental friendly way the best PVB film and PVB resin which fulfils the needs of the customer in the most optimum way. Sekisui S-Lec B.V. obliges the management and the co-workers to take care of the protection of our environment, the health and safety of the personnel and the society in which we are living. Sekisui S-Lec B.V. acknowledges that the activities, consumption of raw materials, products and services could have an impact on the environment. Therefore the care of the environment is a structural part of managing processes, and significant environmental aspects will be reflected as such in the company's targets to reduce the risks. Sekisui S-Lec B.V. envisage the execution of this policy and keeping to the starting points listed below as a fundamental management goal and as a responsibility for every employee and contractor of Sekisui S-Lec B.V. As a part of Sekisui Chemical Group; High Performance Plastics Company, Sekisui S-Lec B.V. perceives the corporate policy and the activity guidelines as primary and will adapt and determine the internal policy accordingly.

Starting points

1. Communicate, and comply with environmental requests of concern (s) of third parties regarding our production and products.
2. Comply, besides continues decreasing of the environmental load and prevention of pollution, to all laws and regulations to which we subscribe.
In addition challenging targets should be defined which are requiring the highest effort to create a better environment and continuously aiming towards Zero Emission.
3. Decrease energy- and raw material use, along with driving back (at the source) and re-using waste materials.
4. Life cycling thinking, considering each stage of a product or service from development to end of life.
5. Co-operate with stakeholders together with support and effort of our employees to realise an acceptable performance for protecting the community, workplace and environment.
6. To conduce sustainability and continues improvement by introduction of ISO-14001:2015 and execution and commitment of the corporate policy of the Sekisui Chemical Group.
7. Leadership of Top management to improve continuously the Environmental Management System by PDCA principles and system development.

Roermond, 15th March 2017

Mr. Yoshio Aoshima
Managing Director
